INTERVIEW SUMMARY

Mail Stop AF
Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicant conducted an interview with the Examiner on October 23, 2006 to discuss U.S. Patent No. 5,519,889 issued to Hipp ("Hipp"), which patent has been cited against claims 1-18. Applicant explained that Applicant believes that *Hipp* fails to disclose a radio including AM reception communicating its present operating frequency with a source of a time varying signal, and the source of the time varying signal adjusting its operating frequency in response to receiving such

Appl. No. 10/665,795

OCT 25 2006

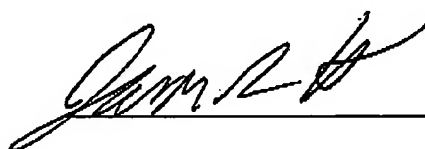

communication if its operating frequency or any of the harmonics of the operating frequency fall within a predetermined interference range of the selected frequency.

Applicant explained that *Hipp* discloses a power supply that is configured to output signals having a frequency (and harmonics) that are constantly within 20 Hz of the center frequency within the AM reception range so that the signal, when demodulated by the radio, is not audible by the human ear. Accordingly, Applicant believes that *Hipp* does disclose any communication between the radio and the power supply because the power supply is configured to have pre-determined output frequencies within 20 Hz of the center frequency and would, thus, not need or desire any communication occurring between the radio and the power supply. In other words, Applicant pointed out that there are not any sections in *Hipp* where the radio communicated a specific operating frequency to the power supply and that the feedback loop in *Hipp* referenced by the Examiner was simply a means for the power supply to maintain its output within the 20 Hz range.

The Examiner requested that Applicant submit a Response to the Final Office Action mailed on September 12, 2006 including arguments based upon the discussion of the contents of the Interview. Furthermore, the Examiner indicated that she would reconsider the disclosure in *Hipp* in light of the Interview discussion and issue a Notice of Allowance, a new Office Action, or an Advisory Action after such reconsideration.

Respectfully submitted,

Date

10/25/06

☐ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

U.S. Patent No. 5,519,889 does not disclose a radio communicating with a source of time varying signal.

An interview was conducted on the above-identified application on 10/23/06

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
